

STORE CONFIGURATION

ADD A MENU LINK TO THE WISH LIST SEARCH FORM

The screenshot shows the 'Main menu' configuration page in Drupal. On the left, a sidebar menu is open with 'Main menu' selected under the 'Menus' category. A red circle with the number '1' is placed over the 'Main menu' link in the sidebar. The main content area shows the configuration form for the 'Main menu'. The 'Menu link title' field is empty, with a red circle '2' and an arrow pointing to it. Below it is a text description: 'The text to be used for this link in the menu.' The 'Path' field is also empty, with a red circle '2' and an arrow pointing to it. Below it is a text description: 'The path for this menu link. This can be an internal path such as *node/add* or an external path such as *http://www.example.com*.' The 'Description' field is empty, with a text description: 'Shown when hovering over the menu link.' Below it are two checkboxes: 'Enabled' (checked) with a red circle '3', and 'Show as expanded' (unchecked). Below these is a 'Parent link' dropdown menu set to '<Main menu>'. Below it is a text description: 'The maximum depth for a link and all its children is fixed at 9. Some menu links may have a maximum depth less than 9.' At the bottom left, there is a 'Save' button with a red circle '4' next to it.

ENABLE 'FIND A WISH LIST' BLOCK

The screenshot shows the configuration interface for the 'Find a wish list' block. The 'Structure' tab is selected in the top left. Below it, the 'Blocks' section is visible. The 'Find a wish list' block is shown with a configuration field set to '- None -'. A red circle with the number '1' is placed over the 'configure' link to the right of the configuration field.
